The 2008 NAEP Arts Assessment measured students’ knowledge and skills in the arts by asking them to observe, describe, analyze, and evaluate existing works of music and visual art and to create original works of visual art.

A nationally representative sample of 7,900 eighth-grade students from 260 public and private schools participated in the 2008 arts assessment. Approximately one-half of these students were assessed in music, and the other half were assessed in visual arts.

The Arts Framework
The NAEP arts framework serves as the blueprint for the assessment, describing the specific knowledge and skills that should be assessed in the arts disciplines. Developed under the guidance of the National Assessment Governing Board, the framework reflects the input of arts educators, artists, assessment specialists, policymakers, representatives from the business community, and members of the public. The National Standards for Arts Education\(^1\) also served as an important reference in the development of the NAEP arts framework.

Scoring Students’ Work in the Arts
Specific scoring guides were developed for scorers to use when evaluating students’ responses that demonstrated a wide range of skill levels in music and visual arts.

Reporting Arts Results
- The average responding scores for music and visual arts are reported on separate 0–300 scales and cannot be compared.

- The average creating task score for visual arts is reported as the average percentage of the maximum possible score ranging from 0 to 100.

Comparisons Between 1997 and 2008
Although the questions in the 2008 assessment were taken from those administered in the 1997 arts assessment, some of the scoring procedures could not be replicated in 2008. Comparisons cannot be made between students’ scores in those two years. However, comparisons can be made for the percentages of students who responded correctly to the multiple-choice questions in the assessment, and the percentages of students based on responses to background questions that were asked in both years.

---

The Music portion of the assessment measured students’ ability to respond to music. Students were asked to analyze and describe aspects of music they heard, critique instrumental and vocal performances, and demonstrate their knowledge of standard musical notation and music’s role in society.

89-point score gap between the lowest- and highest-performing students

- White and Asian/Pacific Islander students scored higher than Black and Hispanic students
- Female students scored higher than male students
- Students from lower-income families scored lower than those from higher-income families

Context for Arts Education in Music

57% attended schools where music instruction was offered at least 3 or 4 times a week in 2008.

What Students Know and Can Do in Music

Students listened to “Rhapsody in Blue”

At the beginning of the piece, a solo is played on

- a flute
- an oboe
- a saxophone
- a clarinet

50% correct

More students were asked to write down music since 1997.

Percentage of students who participate in music activities in school at least once a month

What does the symbol in circle 1 tell the performer to do?

What is the musical (Italian) name for the symbol in circle 1?

* Significantly different (p < .05) from 2008.
The Visual Arts portion of the assessment measured students’ ability to respond to and create visual art.

**RESPONDING** questions asked students to analyze and describe works of art and design.

**CREATING** questions assessed students’ ability to communicate in works of art, think of different solutions to visual problems, and generate ideas for and then create works of art and design.

- White and Asian/Pacific Islander students scored higher than Black and Hispanic students.
- Female students scored higher on creating tasks than male students.
- Students from lower-income families scored lower than those from higher-income families.

**89-point** score gap between the lowest- and highest-performing students.

Context for Arts Education in Visual Arts

47% attended schools where visual arts instruction was offered at least 3 or 4 times a week in 2008.

- No significant changes in the frequency of visual arts instruction from 1997 to 2008.

More students asked to write about their artwork, and fewer students asked to choose their own art project since 1997.

Percentage of students who participate in arts activities in school at least once a month:

- Paint or draw: 80% (1997), 80% (2008)
- Make things out of clay or other materials: 38% (1997), 41% (2008)
- Choose own art project: 47% (1997), 39% (2008)
- Work in a pair or a group on an art project: 43% (1997), 40% (2008)
- Talk with others about own artwork or that of other students: 50% (1997), 53% (2008)
- Write about own artwork: 21% (1997), 27% (2008)
- Look at videotapes, filmstrips, slides, or television programs about art: 45% (1997), 43% (2008)

* Significantly different (p < .05) from 2008.

What Students Know and Can Do in Visual Arts

Students were given a set of colored oil pastels, a charcoal pencil, a mirror, and a sheet of 12-inch by 18-inch white drawing paper to use to create a self-portrait that expressed something important about their personalities. Students’ self-portraits were rated using four scoring levels: Sufficient, Uneven, Minimal, and Insufficient.

4% rated “Sufficient”

25% rated “Uneven”

57% rated “Minimal”

14% rated “Insufficient”
The Nation’s Report Card™ informs the public about the academic achievement of elementary and secondary students in the United States. Report cards communicate the findings of the National Assessment of Educational Progress (NAEP), a continuing and nationally representative measure of achievement in various subjects over time.

Since 1969, NAEP assessments have been conducted periodically in reading, mathematics, science, writing, U.S. history, civics, geography, the arts, and other subjects. NAEP collects and reports information on student performance at the national, state, and local levels, making the assessment an integral part of our nation’s evaluation of the condition and progress of education. Only academic achievement data and related background information are collected. The privacy of individual students and their families is protected.

NAEP is a congressionally authorized project of the National Center for Education Statistics (NCES) within the Institute of Education Sciences of the U.S. Department of Education. The Commissioner of Education Statistics is responsible for carrying out the NAEP project. The National Assessment Governing Board oversees and sets policy for NAEP.
